DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, 8-12, 15-26 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was an actuator, a locator sleeve, and a mechanical lever, moveable along the external surface of a tool capable of exchanging a moment between a tool and vibration damping or flexion controlling device, in combination with the other elements (or steps) of the apparatus and method recited in the claims.

The prior art (5,915,890: Rittweger) discloses a device for controlling vibrations along a tool in which the tool has a locator sleeve. The prior art of record does not disclose a locator sleeve having an external actuator and a mechanical lever which are moveable along the outer surface of the tool to exchange a force to the surface of the vibration damping or flexion controlling device or a moment via the mechanical lever. The prior art further does not teach a locator sleeve connected to a side of a tool clamp, which is attached to the surface of the tool, a force transmission sleeve in contact with the tool and a force exchange device attached between the locator sleeve and the force transmission sleeve to exchange a force to the surface of the vibration damping or flexion controlling device or a moment via the mechanical lever.

The prior art (JP 01098723 A) discloses a device for controlling vibrations along the tool in which a moment is exchanged between the tool and the vibration damping

device. However, the prior art of record does not disclose a mechanical lever and a locator sleeve having an actuator attached thereto are moveable along the outer surface of the tool. The prior art further does not teach a locator sleeve connected to a side of a tool clamp, which is attached to the surface of the tool, a force transmission sleeve in contact with the tool and a force exchange device attached between the locator sleeve and the force transmission sleeve to exchange a force to the surface of the vibration damping or flexion controlling device or a moment via the mechanical lever.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
